## CONTENTS

The salt-finger zone. L. N. Howard and G. Veronis *page* 1

Boundary mixing in a rotating, stratified fluid. G. N. Ivey 25

Coherent baroclinic eddies on a sloping bottom. M. Mory, M. E. Stern and R. W. Griffiths 45

A second-moment closure study of rotating channel flow. B. E. Launder, D. P. Tselepidakis and B. A. Younis 63

Stability of Bödewadt flow. Ömer Savaş 77

Third-order resonance effects and the nonlinear stability of drop oscillations. Ramesh Natarajan and Robert A. Brown 95

A linear analysis of rotating stratified flow past a circular cylinder on a $\beta$-plane. Lee-Or Merkine 123

Oscillations of a gas in a closed tube near half the fundamental frequency. R. Althaus and H. Thomann 147

Observations of dispersion of entrained fluid in the self-preserving region of a turbulent jet. D. Joseph Shlien 163

The far field of an oscillating airfoil in supersonic flow. A. F. Messiter and S. L. Woodruff 175

Experiments on the trajectory and circulation of the starting vortex. David Auerbach 185

The lift force on a spherical body in a rotational flow. T. R. Auton 199

Interface conditions for two-phase displacement in Hele-Shaw cells. D. A. Reinelt 219

Near-surface turbulence in a grid-stirred tank. Blair H. Brumley and Gerhard H. Jirka 235

The stability of inviscid flows over passive compliant walls. K. S. Yeo and A. P. Dowling 265

Non-equilibrium vapour condensation on a shock-tube endwall behind a reflected shock wave. Shigeo Fujikawa, Masahiko Okuda, Teruaki Akamatsu and Tomonobu Goto 293

Roll-up of vorticity in adverse-pressure-gradient boundary layers. M. E. Goldstein, P. A. Durbin and S. J. Leib 325

On the stability of elliptical vortex solutions of the shallow-water equations. P. Ripa 343

Linear stability of a cylindrical falling film. Francisco J. Solorio and Mihir Sen 365

Vorticity and passive-scalar dynamics in two-dimensional turbulence. Armando Babiano, Claude Basdevant, Bernard Legras and Robert Sadourny 379

Cellular flows of a viscous liquid that partly fills a horizontal rotating cylinder. T. Brooke Benjamin and S. K. Pathak 399

Mathematical aspects of trapping modes in the theory of surface waves. F. Ursell 421

Internal gravity waves generated by oscillations of a sphere. J. C. Appleby and D. G. Crighton 439

Subharmonic resonance of nonlinear cross-waves. Seth Lichter and Jerry Chen 451

Rossby waves and two-dimensional turbulence in a large-scale zonal jet. Theodore G. Shepherd 467

Long-time molecular diffusion, sedimentation and Taylor dispersion of a fluctuating cluster of interacting Brownian particles. H. Brenner, A. Nadim and S. Haber 511

Resonant surface waves and chaotic phenomena. X. M. Gu and P. R. Sethna 543

Review

*Turbulence and Random Processes in Fluid Mechanics, by M. T. Landahl and E. Mollo-Christensen* 566
